

Henrik Agner

Solution architect / Tech lead / Senior backend developer

Henrik is an experienced backend specialist and technical leader with a strong focus on scalable services, APIs and system integrations.

He designs and implements reliable backend architecture that supports modern web platforms and business-critical workflows. Henrik has deep experience in .NET, cloud services and integration platforms.

In backend projects he takes ownership of architecture, data modeling and service quality to ensure systems are stable, efficient and easy to operate.

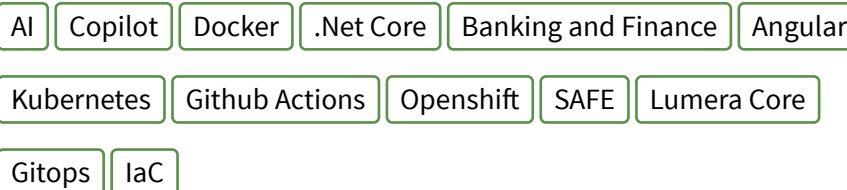

Experience

apr. 2025 - jun. 2026

Senior Fullstack developer

SEB Pension och Försäkring

Henrik works as a senior developer focusing on backend architecture and integrations in a .NET team at SEB P&F. He builds and maintains services for the Lumera core system, handling insurance workflows, data processing and secure APIs.

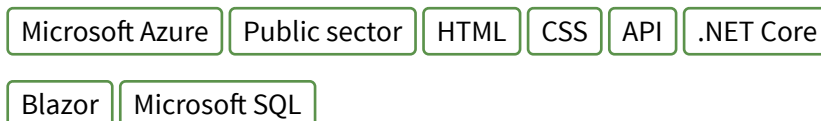

jan. 2025 - dec. 2025

System manager / Senior Fullstack developer

Storstockholms Brandförsvar

Henrik managed backend systems and API services for the solution supporting fire chiefs. He developed and maintained Azure-hosted services for resource planning, user management and secure data handling.

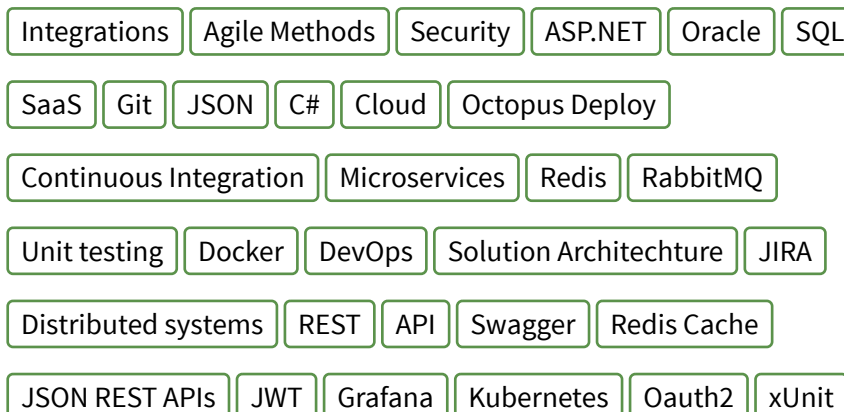

oct. 2024 - feb. 2025

Solution Architect Public API

Questback Sweden AB

Henrik worked as a solution architect with backend focus on modernizing Questbacks integration and API platform. He designed secure, scalable services, integrated OAuth2/JWT authentication, and owned automated testing and deployment.

YAML .NET Core Prometheus API documentation OpenAPI
Atlassian Confluence .NET GitHub Actions Scrum
Open Telemetry Oracle Cloud Infrastructure (OCI) API design
Scaling Message queues CI/CD Infrastructure Zitadel IdP
Scalar API Documentation

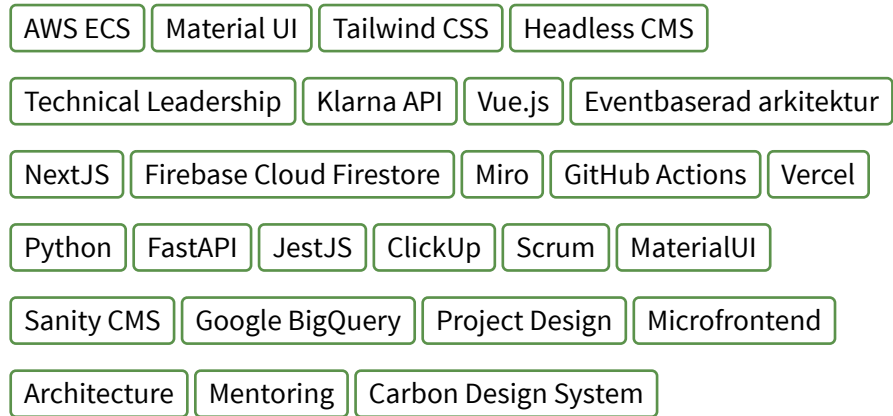

mar. 2020 - oct. 2024

Tech Lead

Keystone Education Group

As Tech Lead, Henrik was responsible for backend architecture and integration solutions across the company portfolio. He led development teams delivering scalable APIs, microservices and data-driven backend systems in .NET, Java, Python and Node.

Google Cloud AWS OVH cloud JavaScript Mentor Linux

Cloudflare SAML WCAG AWS Lambda
Service oriented arkitektur Kubernetes GraphQL PostgreSQL
HubSpot Python Asana Autofixture Zapier React.js

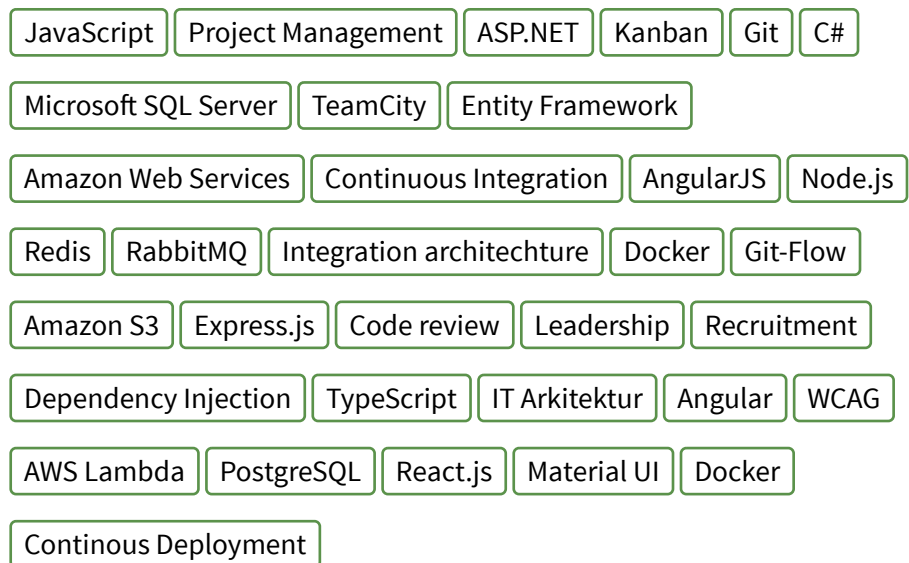

sep. 2018 - mar. 2020

Lead Developer

Keystone Education Group

Henrik owned backend development of the Student Recruitment System, including database design, API development and system integrations. He set standards for reliable services and data flows between components.

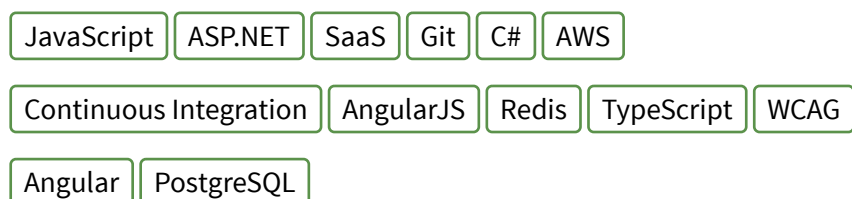

nov. 2015 - sep. 2018

Fullstack Developer

Keystone Education Group

Henrik worked on the backend of the SRS platform, developing servers, APIs and database-driven features in C#/.NET. He focused on building robust backend processes to support the application.

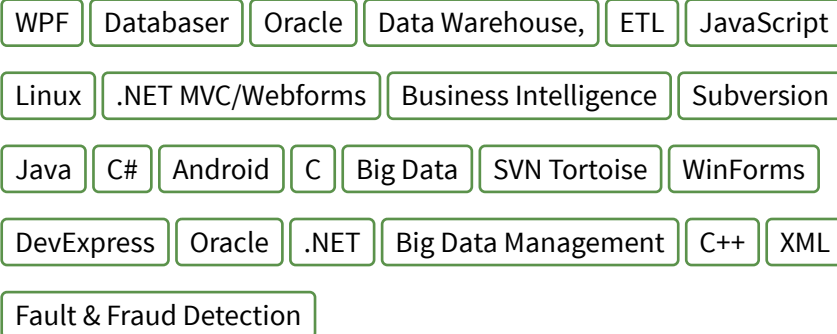

jan. 2014 - nov. 2015

Fullstack Developer

IDSS AB

Henrik worked on backend processes in the iServ platform, creating scalable data pipelines and services for telecom data analysis. He also built backend support for an Android monitoring and alert app.

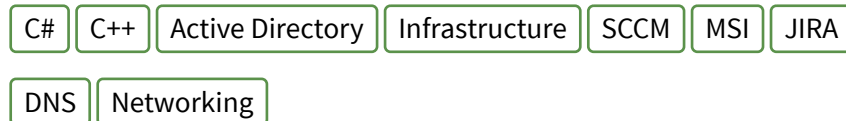

2013 - 2014

Technical Specialist Infrastructure

Tieto AB

Henrik built infrastructure automation and backend tooling for client installations and customer environments. He developed scripts and automation in C#/.NET and C++ that stabilized deployment and operations.

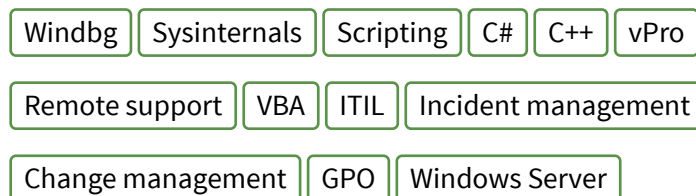

2010 - 2013

Technical Specialist Infrastruktur & Support

Ericsson AB

Henrik improved support by developing backend tools and scripts for troubleshooting and process automation. He delivered custom applications to solve complex client-environment issues.

2008 - 2010

Service Desk Trainer

Ericsson AB

Henrik trained service desk staff and improved support processes, increasing efficiency and operational stability for customer support.

Trainer Teaching Mentoring Process development ITIL
Complaint process Quality assurance

2007 - 2008

Service Desk agent

Ericsson AB

Henrik provided support with emphasis on efficient issue resolution and stable IT operations.

Remote support Telecom Windows

Education

IT - Technical program with a focus on programming and computer networking (Gymnasium) Thorhildsplan Gymnasium

2004 - 2007
