

Henrik Agner

Solution architect / Tech lead / Senior frontend developer

Henrik is an experienced frontend specialist and technical lead with a strong focus on user experience, interface design and modern web platforms.

He builds interactive, accessible and responsive web applications using React, Angular, Next.js and modern frontend workflows. Henrik combines design quality with technical execution to create polished user-facing solutions.

He enjoys collaborating in cross-functional teams to improve frontend architecture, develop reusable components and keep users at the center of every product decision.

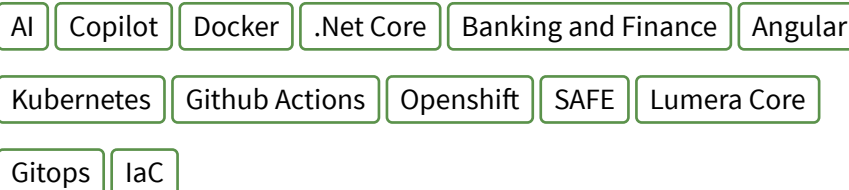

Experience

apr. 2025 - jun. 2026

Senior Fullstack developer

SEB Pension och Försäkring

Henrik works as a senior developer with strong emphasis on frontend experience and Angular interfaces in a .NET team at SEB P&F. He crafts intuitive workflows for insurance products and portal interfaces with clear and efficient user flows.

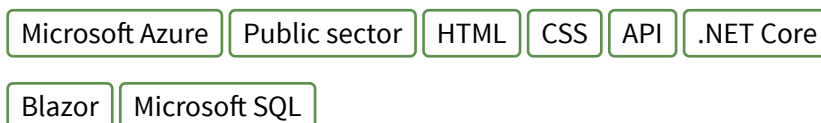

jan. 2025 - dec. 2025

System manager / Senior Fullstack developer

Storstockholms Brandförsvar

Henrik led frontend work for the system supporting fire chiefs, focusing on user experience, responsive design and clear visualizations for resource planning and equipment management.

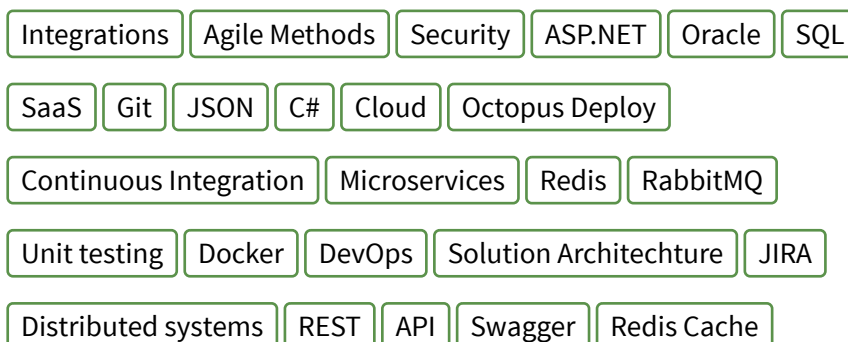

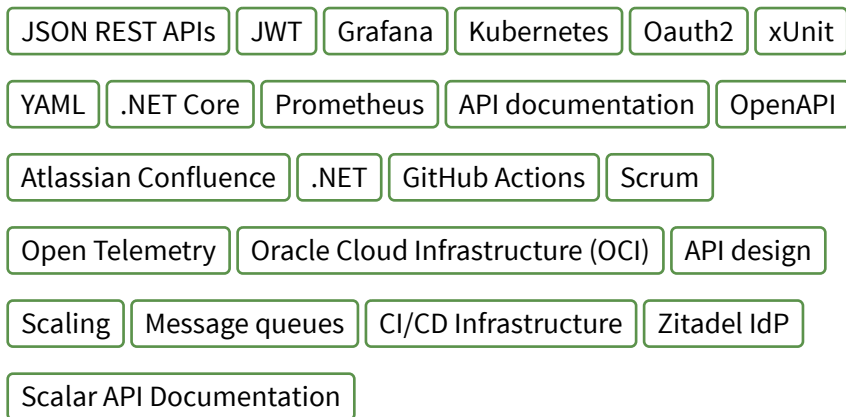

oct. 2024 - feb. 2025

Solution Architect Public API

Questback Sweden AB

Henrik worked as a solution architect with frontend-minded integration design for Questbacks external APIs, ensuring developer portals and documentation complemented modern web applications. He helped shape the API experience so frontend developers can integrate smoothly and efficiently.

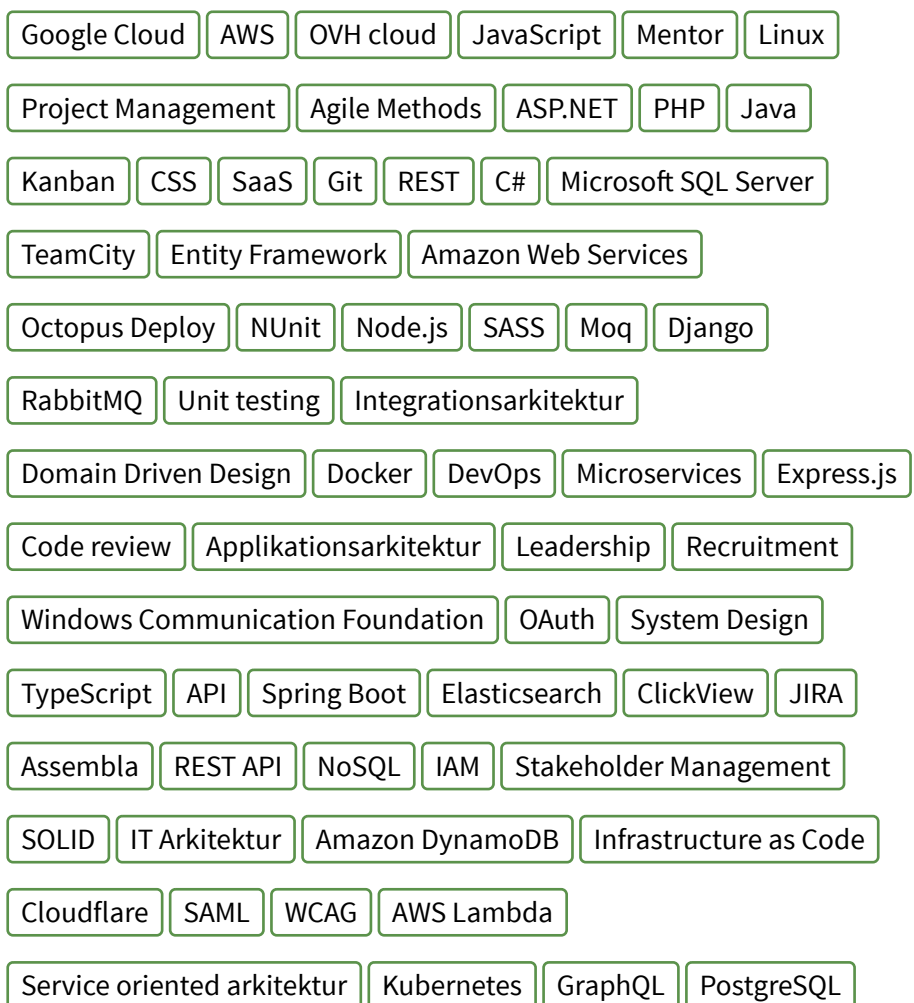

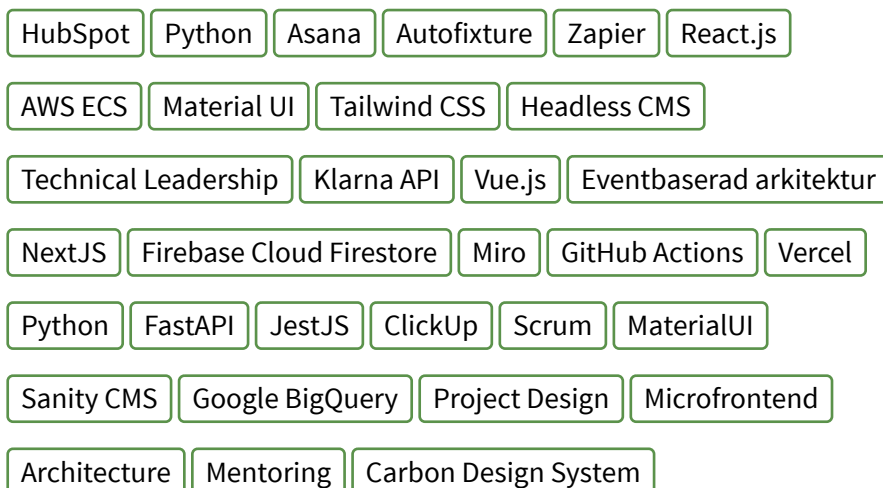

mar. 2020 - oct. 2024

Tech Lead

Keystone Education Group

As Tech Lead, Henrik focused on frontend architecture and user experience across the company's products. He delivered polished web interfaces in React, Next.js and Tailwind, while making sure experiences worked seamlessly with backend and cloud services.

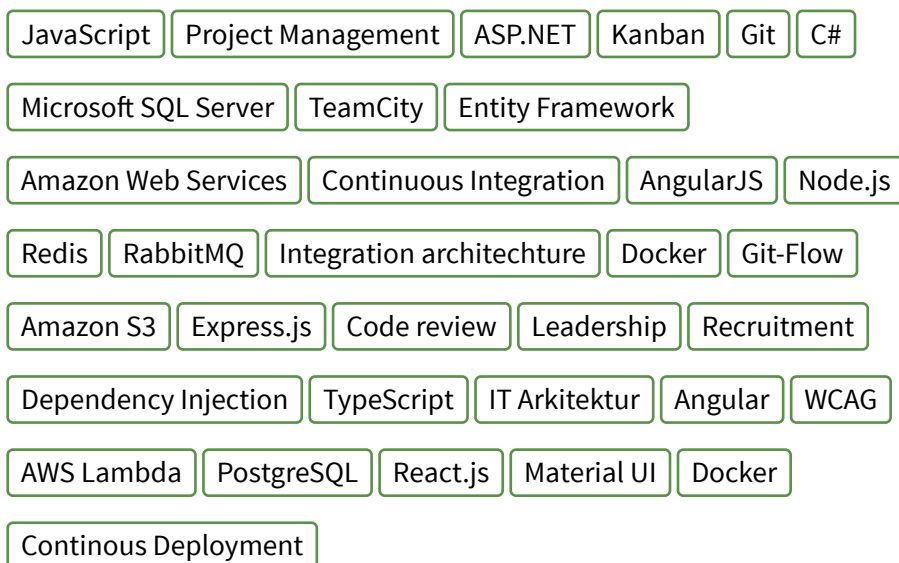

sep. 2018 - mar. 2020

Lead Developer

Keystone Education Group

Henrik led frontend development for the Student Recruitment System, building modern interfaces in Angular and TypeScript. He set standards for component design, usability and performance across new and existing application areas.

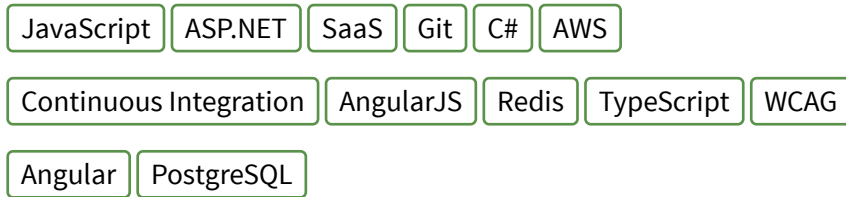

nov. 2015 - sep. 2018

Fullstack Developer

Keystone Education Group

Henrik worked on the SRS platform frontend and built user-friendly interfaces using C# / .NET, JavaScript and AngularJS. He focused on improving visual workflows, responsiveness and overall user experience.

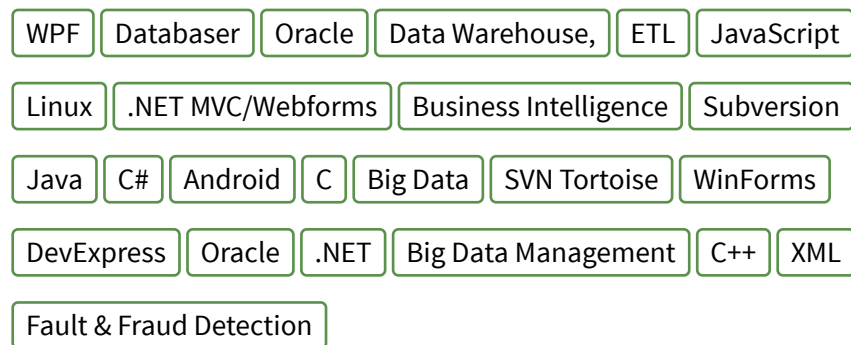

jan. 2014 - nov. 2015

Fullstack Developer

IDSS AB

Henrik contributed frontend work to the iServ platform by building interfaces for telecom data visualization. He created dashboards and reports that made complex data easy to navigate.

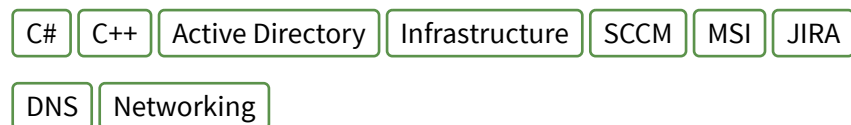

2013 - 2014

Technical Specialist Infrastructure

Tieto AB

Henrik improved client-side experiences through automation and tooling, making desktop environments and installations smoother to use. He helped shape the end-user interface of client systems.

2010 - 2013

Technical Specialist Infrastruktur & Support

Ericsson AB

Henrik improved user-facing support tools and automated workflows so Ericsson users could resolve issues more easily. He built clear tools and scripts for support staff in Windows environments.

Windbg Sysinternals Scripting C# C++ vPro
Remote support VBA ITIL Incident management
Change management GPO Windows Server

2008 - 2010

Service Desk Trainer

Ericsson AB

Henrik trained service desk staff in communication and tool usage, helping deliver better user experiences and more consistent support.

Trainer Teaching Mentoring Process development ITIL
Complaint process Quality assurance

2007 - 2008
